

WHAT IS CLAIMED IS:

1. A method for automatically creating at least one dialog box on an operator interface of a computer user station, which is connected to an industrial process installation via at least one interface so as to transmit data, wherein the dialog box displays the transmitted data of the process installation on the operator interface, the method comprising:

- a) assigning the transmitted data of the process installation that is to be displayed to certain, stored data types; and
- b) creating the at least one dialog box on the operator interface of the computer user station so as to display the data to be displayed utilizing display types that are respectively assigned to the data types.

2. The method as claimed in Claim 1,

wherein the data is selected from the group consisting of process data, status data, control data and regulating data; and

wherein the display types are selected from the group consisting of pointers, bars, and numeric displays.

3. The method as claimed in Claim 1, wherein the dialog box is retrieved on the operator interface of the computer user station via a link identifier of a further dialog box.

4. The method as claimed in Claim 3,
wherein the further dialog box is assigned to a library stored in the computer user station.

5. The method as claimed in Claim 3,
wherein the further dialog box is created via a supporting graphics program.

6. The method as claimed in Claim 1,
wherein the transmitted data that is to be displayed is selected from the transmitted data of the process installation.

7. The method as claimed in Claim 1, further comprising:
modifying an assignment of the data types and the display types.

8. The method as claimed in Claim 1, further comprising:
modifying a number and a type of the display types.

9. The method as claimed in Claim 1, further comprising:
modifying a number and a type of the data types.

10. A method, comprising:

assigning data, which are transmitted from a technical facility to a computer,
to respective data types stored in the computer;

assigning the data types to respective display types; and

automatically generating at least one dialog box on a graphical user interface
of the computer so as to display the data on the graphical user interface with the data
types and the display types.
